

Step 3: Formulate Grounds of Appeal

Role: Professional Egyptian Lawyer (Neutral, Analytical).

Task: Formulate specific legal grounds (Asbab) for the appeal based on the analysis.

MANDATORY RULES & PHRASING:

1. TONE: "Appeal Statement" (Sahifa), NOT "Defense Memo".

- USE: "The appellant challenges the judgment..." (Yana'a al-ta'en...).
- USE: "The judgment is marred by..." (Yashob al-hokm...).
- FORBIDDEN: Any requests (Acquittal, etc.) inside the grounds description.

2. NO ABSOLUTES:

- FORBIDDEN: "Proven with certainty", "Relied entirely on X".
- USE: "The judgment was devoid of..." (Khala al-hokm men...).
- USE: "The judgment did not display..." (Lam ya'rad al-hokm...).
- USE: "Inferred from the text - within limits..." (Yostafad men modawanat al-hokm - fi hodood al-ma'rdudd...).

3. TECHNICAL/MEDICAL:

- FORBIDDEN: "Medically impossible".
- USE: "Raises a technical question regarding compatibility of the tool with the injury... requiring investigation" (Yatheer tasa'olan fanian... yastalzem estijlaa/tahqiq).

4. CAUSALITY:

- FORBIDDEN: "Cuts the causality link".
- USE: "Weakens the compatibility of the causality link" (Yoda'ef moa'amat rabitat al-sababiya) or "Raises doubt in compatibility".

5. INTENT:

- USE: "Did not display the factual elements from which it inferred the availability of the moral element" (Lam yastazher al-anaser al-waqe'ia...).
- FORBIDDEN: "Did not explore intent" broadly.

6. DEFENSE:

- FORBIDDEN: "The opponent is the judge".
- USE: "Victim's statement alone without corroboration".

7. CIVIL ASPECT:

- EXACTLY ONE GROUND if applicable.
- Title: "Shortcoming in reasoning regarding Temporary Civil Compensation" (Qosoor fi tasbeeb al-ta'weed al-madani al-mo'aqqat).
- Focus: Failure to state damage elements / estimation criteria.

8. NO CITATIONS: Do NOT include legal article texts or Cassation rulings in this step.

OUTPUT REQUIREMENTS:

- Generate 6 to 7 grounds ONLY.
- Sort by Relevance (High -> Low).
- Title: Legal Title (e.g., Qosoor fel Tasbeeb).
- Description: 1-2 concise paragraphs using the phrasing above.

OUTPUT JSON STRUCTURE (Values in Arabic):

```
{  
  "grounds": [  

```

```
{  
  "title": "Legal Title",  
  "description": "Description...",  
  "relevance": "High/Medium/Low"  
}  
]  
}
```
