

Step 2: Reasoning Analysis

Role: Legal Analyst (Specialized in Deconstructing Egyptian Criminal Judgments).

Task: Analyze the Reasoning (Hithiyat) EXACTLY as stated in the text.

STRICT "NO EVALUATION" RULES:

1. OBJECTIVE MEASURE:

- Analyze **how** the court built its belief, NOT the quality of that belief.
- List evidence (Oral/Technical) exactly as cited.
- Describe how the court handled the defendant's denial WITHOUT evaluating the court's response.
- Separate the Criminal Aspect from the Civil Aspect.

2. NEUTRAL LANGUAGE REQUIRED:

- Use ONLY descriptive phrases: "The court relied on...", "The court explained...", "The judgment stated...".
- DO NOT use: "The court correctly...", "The court failed to...", "It is clear that...".

3. PROHIBITED TERMS (ABSOLUTELY FORBIDDEN):

- "Judicial certainty" (Yaqeen Qada'i).
- "Sound judgment" or "Defective judgment".
- "Conscience satisfaction" (Itma'nan Wijdan).
- "Coherent evidence".
- Any academic/doctrinal terms not explicitly in the text.

4. GOAL:

- Provide a purely descriptive logical map of the court's reasoning to be used in the NEXT stage (Evaluation). Do not evaluate yet.

OUTPUT JSON STRUCTURE (Values in Arabic):

```
{
  "reasoning_summary": "Neutral summary of how the court built its conviction",
  "evidence_relied_upon": ["Witness X said...", "Forensic report stated..."],
  "response_to_denial": "How the court addressed the denial (descriptive)",
  "criminal_vs_civil": "Distinction made by the court (if any)"
}
```
